

Andy Dyke Car History

-**Avenger 1600GL** red - alloys - big wheels on the back - vinyl roof and a rev counter! Sold it to my next door neighbour with rotten sills, no second gear and faulty brakes. He was buying it as a run around for his mother-in-law! That's the truth! Sold it for £50 - stereo was worth more.

-**Capri 2.0 GL**, silver with RED, yes red seats, spoiler and APSS cassette deck - wow.

-**XR3i 1600** red (yes afraid so). Traded in when I forgot to change the timing belt in time and a few pistons went through the head!

-**XR3i 1600** red (again).

- **Astra 1800 SRi** - first company car. Took it to Newcastle when it was just 2 weeks old. It was stolen by joy riders and driven in to a wall. Got it back but it was never the same. (not that it was that good in the first place)

- **Rover 216GSI** - Black. Honda engine - high revver and that's about it.

- **Rover 620i** - Met blue. Loved it. Quiet and bigger.

- **Volvo S70** - Met Silver, auto etc. No style but a good drive.

- **Jaguar S- Type** 3.0, Met blue.

- **Mercedes E-Class** saloon - Met blue 320CDi. (Last company car)

- Currently **Mercedes CLK320 Cab.** - Met silver.
